- ✓ This was revealed based on the draft conclusions of the two-day G20 summit which began on October 30.
- ✓ The G20 had called upon the OECD/G20 Inclusive Framework on Base Erosion and Profit Shifting to develop the model rules and multilateral instruments as agreed in the Detailed Implementation Plan
- ✓ Earlier this month, a major reform of the international tax system was finalised at the OECD (Organisation for Economic Co-operation and Development) that will ensure that multinational enterprises (MNEs) will be subject to a minimum 15% tax rate from 2023.
- ✓ The landmark deal, agreed by 136 countries and jurisdictions representing more than 90% of global GDP, will also reallocate more than \$125 billion of profits from around 100 of the world's largest and most profitable MNEs to countries worldwide
- ✓ This will ensure that these firms pay a fair share of tax wherever they operate and generate profits.
- ✓ A total of 136 jurisdictions (out of the 140 members of the OECD/ G20 Inclusive Framework on BEPS) joined the statement to address the tax challenges arising from the digitalisation of the economy.
- ✓ With Estonia, Hungary and Ireland having joined the agreement, it is now supported by all OECD and G20 countries.
- ✓ Four countries — Kenya, Nigeria, Pakistan and Sri Lanka — have not yet joined the agreement.
- ✓ Pillar One will ensure a fairer distribution of profits and taxing rights among countries with respect to the largest and most profitable multinational enterprises.
- ✓ It will re-allocate some taxing rights over MNEs from their home countries to the markets where they have business activities and earn profits, regardless of whether firms have a physical presence there.
- ✓ Specifically, multinational enterprises with global sales above 20 billion euros and profitability above 10% will be covered by the new rules, with 25% of profit above the 10% threshold to be reallocated to market jurisdictions.

- ✓ Under Pillar One, taxing rights on more than \$125 billion of profit are expected to be reallocated to market jurisdictions each year.
 - ✓ Pillar Two introduces a global minimum corporate tax rate set at 15%.
 - ✓ The new minimum tax rate will apply to companies with revenue above 750 million euros and is estimated to generate around \$150 billion in additional global tax revenues annually.
